

Bullard Accessories

Extra Advantages for Critical Needs

Law enforcement officials need to rely on the most sophisticated equipment when responding to an incident. That's why Bullard has a complete line of thermal imaging products designed to meet the rigors of law enforcement.

Make the most of your thermal imager.

- Mobile Command Center
- SceneCatcher™
- Transmitter System
- MobileLink™ Handheld Receiver
- TacPowerhouse
- TacScope
- TacPort
- Glare Shield
- Hard Case
- Alkaline Pack

Mobile Command Center

The Mobile Command Center digitally records transmitted video from a Bullard Thermal Imager and encourages team viewing with its large 15.4-inch monitor and two-channel receiving capability. The unit gives scene commanders the mobility they need to view an incident from a command station by receiving, displaying and playing back video transmitted from a thermal imager. Its rugged briefcase-style makes for easy maneuverability and operation.

Features:

- Large 15.4-inch display
- Works with all Bullard thermal imagers
- Triple Powered:
 - 110/240v Wall
 - 12v Vehicle
 - Three-plus hours from internal battery
- Two-channel receiving capability
- Screen playback
- Dry erase surface for easy note-taking

Part number:

DMCC1

2-Channel Digital Mobile Command Center

MobileLink™ Handheld Receiver

The MobileLink is designed for versatility by allowing an incident commander or safety officer to monitor transmitted thermal imaging video while on the move. Its compact, easy-to-use handheld receiver fits the needs of every law enforcement officer. MobileLink uses no cords or bulky antennas and allows the user to monitor a scene from up-close or from distances up to 600 feet through typical construction.

Part number:

ML1

2-Channel
MobileLink with
battery, battery
charger, and AC/DC
adaptors

ML2

2-Channel MobileLink only

TacScope

The TacScope is the only monocular eyepiece available for thermal imagers that is attachable and detachable. It transforms the TacSight Thermal Imager into a monocular viewfinder for added officer safety.

Part number:

TACSCOPE

*Not compatible with TacSight SE35

TacPowerhouse*

Ruggedly-durable, the TacPowerhouse features a unique locking mechanism to secure your thermal imager while charging. The unit requires no connector cords and can simultaneously charge a spare battery. Its convenient storage compartment holds an alkaline battery pack plus other items.

Part number:

TACPOWERHOUSE

Glare Shield

The Glare Shield eliminates glare in daylight operations and can be held at arm's length or close to your face.

Part number:

T3GLAESHIELD

SceneCatcher™

This digital video recorder simultaneously captures 60 minutes of video and more than 300 still images from a Bullard Thermal Imager. Digital images and videos download easily through a USB. The SceneCatcher offers seamless operation with the Bullard transmitter system.

Part numbers:

TACSS

Standard Scenecatcher DVR

TACSSTRANS2

SceneCatcher DVR and 2-channel Transmitter

Transmitter System

The Wireless Transmitter is housed in an attachable handle and is capable of transmitting clear thermal imaging video through typical construction. This lightweight transmitter is perfect for safety officers who are monitoring an extreme situation from a remote location.

Part number:

HANDLETRANSONLY2

2-Channel transmitter

Alkaline Pack

The Alkaline Battery Pack is a perfect backup when standard rechargeable batteries are not an option.

Part number:

RCN17ALK

TacPort

Thermal imagers can be converted from a highly mobile, handheld device to a longer term, fixed position surveillance unit. The TacPort attachment provides video-out functionality and auxiliary power ports for extended operation from an external power supply, such as a vehicle's cigarette lighter. Includes 12v power cord.

Part number:

TACPORT

Hard Case

Protect your thermal imager and accessories in this ruggedly-designed Hard Carrying Case. Case stores your Thermal Imager, Transmit Handle, MobileLink, TacPort, charger and two spare batteries.

Part number:

HARDCASE

Where does Bullard get the ideas for accessories? From you.

Bullard accessories are created from comments we receive from law enforcement officers in the field. When a law enforcement officer says, "I could really use that," we're there to provide the solution. Whether it's a search and rescue mission, collision investigation, fugitive search, or retrieval of evidence, the Bullard thermal imaging products are engineered for reliability and safety to aid law enforcement officers.
